DETAILED ACTION

1. This is in response to a letter for patent filed on September 02nd, 2003, in which claims **1-7** re presented for examination. Claims **1-7** are pending in the letter.
2. The specification should be updated, because application 10/047,574 becomes U.S. Pat. No. 6,658,325 B2. Correction is required in the next communication.

Information Disclosure Statement

3. The information disclosure statements filed on September 02nd, 2003 comply with the provisions of MPEP § 609. It has been placed in the application file, and the information referred to therein has been considered as to the merits. A signed copy of the form is attached.

Specification

4. The abstract of the disclosure is objected to because of the word "invention". Correction is required. See MPEP § 608.01(b).

Double Patenting

5. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claim 4 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 6,658,325 B2. This is a double patenting rejection.

Dependent claims not specifically rejected are rejected as being dependent upon a rejected base claim.

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA

1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

7. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,658,325 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claim of the application encompasses the claim of the patent because it is broader. The only missing language is "non Internet".

8. Claim 7 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 4 of U.S. Patent No. 6,658,325 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claim of the application encompasses the claims of the patent because it is broader.

Dependent claims not specifically rejected are rejected as being dependent upon a rejected base claim.
